Energy Efficiency Program

Energy Efficiency

YOUR **COMFORT ZONE.**

Natural gas provides the amenities that make us feel at home. Installing energy efficient solutions saves you money and makes your home more comfortable year-round. Along with monthly bill savings, you can earn rebates by installing qualified, high-efficiency natural gas appliances.

MAKE YOURSELF AT HOME.

 **Lower heating costs and improve comfort with efficient, natural gas fireplaces.**

Pro tip: When shopping for an energy efficient, gas fireplace, ask for the EnerGuide Fireplace Efficiency (FE) rating. Install a fireplace with an FE rating of 70% or higher to qualify for a \$100 IGC rebate.

 **An ENERGY STAR certified natural gas furnace is 15% more efficient than baseline models and can save you up to \$84 a year.**

Pro tip: Install a 95% AFUE or higher natural gas furnace to qualify for a \$350 rebate.

 **A tankless water heater can save a family of four \$1,800 over its lifetime compared to a standard gas storage water heater.**

Pro tip: Tankless water heaters only heat water when you need it. Get a \$150 rebate when you install a .91 EF or greater tankless water heater.

 **Find rebate details and more tips at www.intgas.com/saveenergy.**

Let us *hear from you.*

Tell us a little bit about yourself so we can better meet your energy efficiency needs. Take just a moment to complete a brief 3-question survey. You can access it by scanning the QR code below or by visiting www.intgas.com.
