

NOTE 1: Locate the gas meter on a wall beneath the gable-end of the roof with at least 16 inches from the outer edge of the roof and at least 24 inches from where the gable intersects with a forward-sloping roof. Locate a gas meter on a wall beneath a flat roof only if the overhang is at least 28 inches and the gas meter can be placed at least 16 inches from the outer edge of the roof.

NOTE 2: IGC must grant approval for alternate locations. A gas meter shelter may be required in some cases.
