

Residential Energy Efficiency Rebate Program TERMS AND CONDITIONS

Deadline Dates: Rebates for qualifying natural gas equipment must be submitted within ninety (90) days of installation. Energy Star® home rebate applications must be submitted within ninety (90) days of Energy Star® verification.

Eligibility: Energy-efficiency rebates are available to residential customers of Intermountain Gas Company (IGC) served on its residential rate schedule in the state of Idaho. Customer must heat home exclusively with natural gas provided by IGC to qualify for all space heating rebates, and use natural gas exclusively as the water heat fuel to qualify for water heating incentives. Customers must use natural gas for both space and water heating to qualify for Energy Star whole home rebates. Customer must not use a heat pump for space heating, even if a natural gas furnace is utilized as backup. If a heat pump is installed in the home, it must be wired to the “Cool Only” setting.

All equipment must be installed according to current code and approved by local or state inspection with the signed, approved permit attached to the newly installed equipment. All equipment must be installed and work completed by a licensed and bonded contractor unless self-installed. At its sole discretion, IGC may make eligible the work of other qualified contractors on a case-by-case basis.

Rebate will be paid after completion and verification of the energy savings measure/s and submission of all required documentation. Customers are advised to retain a copy of this rebate application and any other documentation submitted to IGC under this program.

Support Documentation: Support documentation is required for all rebate-eligible, energy-efficiency equipment, including final invoices that list installation date, cost, brand, model number and serial number. Support documentation for the Energy Star home rebate is required, including completed Energy Star verification/certification documents. IGC reserves the right to verify that work was completed, and meets program standards, through an in-home site inspection.

Payment: Rebates shall be paid directly to the qualifying participant in the amount authorized at the date the qualifying energy efficiency upgrade was installed. Please allow six to eight weeks for rebate processing.

Measures: Rebates for authorized energy savings measures are limited to the amounts provided on IGC’s Residential Energy Efficiency Rebate Program tariff. All rebate measures must meet IGC’s required energy specifications. Stand-alone furnace and water heating measures may not be combined with Energy Star whole-home rebates. Current rebates, specifications, and rebate amounts can be found on IGC website at <http://www.intgas.com/saveenergy> and are subject to change. Eligible equipment must be installed during the effective dates of the current rebate program tariff to qualify for a rebate. If you are uncertain about the efficiency level of the equipment being replaced, or have any questions regarding this policy, please contact IGC at **1-800-548-3679**.

Disclaimer/No Liability: Customer understands that, while IGC may have provided rebates for approved conservation measures and equipment, IGC is not supervising work performed for Customer, nor is IGC responsible in any way for proper completion of that work or proper performance of any equipment purchased. Customer assumes the risk of any loss or damages that Customer may suffer in connection with the installation of rebate-eligible, energy-efficiency upgrades. IGC does not guarantee any particular energy savings results by its approval of this application, or by any of its actions.
